

L/AISON-2

Chief, D/GG

21 November 1958

SA to Ch/G/RR

25X1A6a

Requirement Support [REDACTED]

1. At Ch/G's request, Strategic Branch has levied the following requirements on us.

a. A list of priority towns in the USSR and in the European Satellites, to include those currently being covered in projects for EE and SR. The list should include the towns covered in the short list sent us [REDACTED] some months ago.

b. A list of priority elements of information desired on urban areas.

c. A list of criteria used in selecting areas of priority interest other than urban areas. An accompanying list of the present areas of priority interest would also be in order.

2. These requirements are for informal distribution to DRC and other appropriate parties, and are desired in six copies each.

3. Strat also requests copies of GRA studies on Soviet Bloc mapping agencies or mapping programs. This request is for the 501st Engineer Group, Schwetzingen. It might be appropriate here to include a copy of D/GL/D/GG's Soviet and Satellite observation and elicitation guides.

4. Please transmit the materials when assembled to OCh/G/RR. I will work out the further transmittal with [REDACTED]
